CALL TO ORDER
The Landbank Board meeting was called to order by Peter Scully, at 11:35 a.m. There was a quorum present...

PUBLIC PORTION - Re: 1305 S. Strong Ave., Copiague
Peter Scully noted for the record that this property is presently in litigation.

Angelo Marino, Owner of Interstate Auto Glass Distributors (28 employees), and Cover Luxe Baseboard Co. (17 employees). Mr. Marino has been in business in Copiague for 29 years; and would like to consolidate both businesses into one location at 1305 S. Strong Ave., Copiague.

Mr. Marino is a prospective purchaser of 1305 S. Strong Ave., Copiague (presently in litigation), presently has a
contract in place with current owner of the property. Mr. Marino has plans to renovate the building to bring it up to code and plans to hire between 30 and 45 new employees. Mr. Marino was unaware that there were issues with the property.

The current owner of the property, Dominick Mavellia, of The Crescent Group, was also present at this meeting and asked to speak.

Per Landbank Counsel, Robert Braun, litigation is ongoing and could be a lengthy process. The matter is now in the appeal process. Total outstanding tax liens are $1,137,000. If the courts grant the relief that the current owners are asking for the Landbank will no longer have a building to redeem.

After a brief discussion, it was recommended that the best course of action would be for Mr. Mavellia, who expressed a desire to drop his lawsuit against the County, have his Counsel arrange a meeting to discuss his proposal with the County's Litigation Bureau and the Landbank's Counsel, Robert Braun.

**Note:** Hon. Rich Schaffer, Babylon Town Supervisor, recused himself from the conversation as this matter may potentially come before the Babylon Town Board in the future.

Public Portion closed.

- All the onsite work has been completed and the Draft report has been received.

**Joseph Gavin of Apex Companies gave a brief summary of the Phase II findings:**

**Soil Conclusions**
- Soil data collected during the Phase II indicated that several parameters analyzed were detected above respective Soil Cleanup Objectives.
- Contaminants found on site may be indicative of undocumented soil and fill material deposited during the sites prior use as a landfill.
- 31 test pits installed throughout the site found debris at various depths (voc's, telephone poles, trees, metal, plastic, tires and glass.)
- 12 test pits encountered native soil between 10' to 19', 19 test pits encountered debris to the extent of the excavators reach, 20' to 22'

**Groundwater Conclusions**
- 6 Groundwater wells were sampled - 4 new wells installed and 2 existing wells from previous investigation.
- Based upon review of the data, no significant groundwater concerns were noted.

**Vapor Conclusions**
- 8 temporary soil vapor monitoring points were installed along the perimeter of the site.
- Additional monitoring for methane was performed at all test pits, soil boring locations and new monitoring well locations.
- Methane was recorded only during the setting of new groundwater monitoring wells.

Janet Gremli stated that the DEC would have to make the final determination as to the remediation and the projected end use for the site. There are enough conclusions in this report that a potential purchaser could refer to, but quite often they do contact the DEC for concurrence on those conclusions.
